In this explosive piece, Sasha Latypova argues that RFK Jr. crossed a political and moral red line by issuing a PREP Act declaration tied to a so-called pandemic threat.

She states the move directly contradicts Kennedy's own past statements condemning liability protections for pharmaceutical countermeasures as **unconstitutional**.

Latypova frames the declaration as proof that **the p[l]andemic emergency apparatus remains fully intact regardless of who is in office.**

She also predicts Kennedy may be forced out before July 18.d

Bobby Kennedy Fakes a Pandemic in One Easy Step - by Issuing a PREP Act Declaration for Hoax-a-Virus

Who could have predicted this? I did, about a week ago...

Sasha Latypova | substack.com/@sashalatypova

Readers, about a week ago I asked you to predict if this would happen, and most of you agreed this was coming. Did we nail this prediction, or what? And we didn't even use a crystal ball...

My next prediction - Kennedy is getting fired/resigned before July 18th or thereabout. Read below why I think this is likely to happen.

Who here still believes that pandemics really do exist? I hope none of my audience are that dense and have stopped buying the CIA-deep state baloney which they use to make bio-chemical poisons/ assassination weapons, and then "commercialize"/launder their accumulated intellectual property for profit extraction via "vaccines", "public

health” and “countermeasures” funded and purchased by the government cash laundromat. Can’t leave a zillion dollars on the table, can we? Win. Win.

Bobby knows pandemics are routinely faked by the government. “Except not covid! That one is real!” I am still laughing hysterically whenever I re-watch this clip:

Sorry, Bobby, your ship has sunk into the swamp and you morphed into quite a lizard…

How it started in 2024:

Robert F. Kennedy Jr
@RobertKennedyJr

HHS Secretary Becerra just issued a PREP Act declaration for bird flu. This allows the FDA Commissioner to issue EUAs for bird flu vaccines, with no liability.

The US government has ordered 4.8 million doses of bird flu from the CSL Sequirus company, produced in dog kidney cells and using a dangerous squalene-containing adjuvant.

The AMA issued CPT codes for this vaccine last Friday, so doctors could be reimbursed for administering it.

There have been a total of 11 cases of bird flu in the US since 2022, all mild, most involving just conjunctivitis. None were shown to have been transmitted human-to-human.

Why would you need this vaccine, unless you expected a much more virulent virus to appear which had mysteriously gained the ability to spread between humans?

Will there be another lab-derived pandemic? Not on my watch!

How it's going May 22, 2026:

Today, I signed a targeted PREP Act declaration to support the development and deployment of medical countermeasures related to Andes virus, which can cause the deadly respiratory illness Hantavirus Pulmonary Syndrome.

This action helps remove barriers to research and response efforts while we continue monitoring the recent outbreak linked to the South Atlantic cruise ship. HHS is taking this situation seriously and will continue working to protect public health and support the safe development of potential treatments and countermeasures.

Here is the declaration itself:

The only “positive” thing about it is that it’s issued for 1 generic drug and currently issued to last until July 18, 2026, i.e. it is very narrow in scope and timing:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Notice of Declaration Under the Public Readiness and Emergency Preparedness Act for Medical Countermeasures Against Andes Virus

AGENCY: Office of the Secretary, Department of Health and Human Services.

ACTION: Notice of declaration.

VI. Covered Countermeasures

42 U.S.C. 247d-6b(c)(1)(B), 247d-6d(i)(1) and (7)

Covered Countermeasures are favipiravir.

XII. Effective Period

42 U.S.C. 247d-6d(b)(2)(B)

Liability immunity for Covered Countermeasures extends through July 18, 2026.

However, the narrow scope of the declaration doesn’t make Kennedy less of a sellout.

1. Kennedy knows, and have explicitly said (just a few days ago) on video in the past that PREP Act is unconstitutional, and that these declarations remove our rights and serve no purpose other than enriching military-industrial complex:

In a vid posted on May 17, 2026, RFK Jr. specifically highlighted countermeasure liability shields as unconstitutional!

> "Nobody in the press complained. They just said, 'Oh, it's 'cause there's a disease"

2. He knows he is committing treason. And committing it for 1 item for 2 months doesn't make it less so. "I am forced to commit treason by my boss" - is not a valid defense. "My predecessors committed same treason many times" - also not a valid defense.

4. There is no need for a PREP Act declaration to use a generic antiviral drug off-label. Every doctor has the right to practice medicine and can prescribe this drug and do not need a full government liability waived.

Therefore, I will believe it when I see it if the declaration expires after July 18. For now, I think it's more likely Kennedy will be fired/resigned before that date and the declaration will stay and may get expanded. That's my current prediction.
